

# CS110 B Project

GitHub Link: <https://github.com/LienLeinad/-CS110-Project-B-Tree>

## Contributions of Each Member

### Neil Daniel B. Bautista

- Made a method for reading the input which required the command, integer and object value
- Created the insert method
- Created the split method
- Created the BTreeManager class
- Consistently bug fixed the class files, especially with the insert method which was a critical part of the overall program

### Miguel Alfredo A. Madrid

- Made a method for reading the input which required the command, integer and object value
- Created the update method
- Contributed an algorithm for the Node class where keys were able to be sorted
- Contributed to the insert method
- Consistently bug fixed the class files
- Made the code look neater

### Jessica Anne M. Manzano

- Made a method for reading the input which required the command, integer and object value
- Created the ValuesManager class
- Created the select method
- Created a Tester class to test the overall program
- Consistently bug fixed the class files
- Made the code look neater and more readable
